## **Koch's Turkey Farm introduces Cranberry Turkey Burgers**

**TAMAQUA, PA** – Koch's Turkey Farm announced today the formal introduction of its first entree in the Turkey Burger marketplace with Cranberry Turkey Burgers.

Koch's Cranberry Turkey Burgers are made with all natural turkey and have no artificial ingredients. The burgers contain a minimal amount of fat and go from the skillet to the plate in about 5 minutes. Making them a quick healthy meal for families looking for healthy alternatives to beef burgers.

"Our new burgers are truly unique, they combine the great taste of cranberries with our delicious turkey," said Duane L. Koch, president of Koch's Turkey Farm. "With these new burgers families can now continue to eat great tasting burgers without the worry of having too much red meat in their diet."

Sold nationally at Whole Foods and other fine natural foods stores, Koch's turkeys grow naturally without the use of hormones, stimulants or antibiotics. Each turkey is fed a special all-natural vegetarian diet and allowed free-range access, weather permitting.

In addition to all natural and organic whole turkeys, Koch's Turkey Farm also features a full line of all-natural turkey products including Lil' Gobblers turkey bites, nitrite-free smoked turkey breasts, ground turkey, turkey deli meats and marinated turkey fillets.

All turkeys are raised humanely with Koch's receiving a near perfect score on the Turkey Welfare and Humane Practices independent audit conducted by Steritech, one of the premier providers of food safety and quality assurance services in North America.

Founded by Lowell Koch in 1953, the Koch's Turkey Farm tradition continues today with second-generation family members Barbara Koch, Duane L. Koch, Beth Koch Argall and Pamela Koch Williams.
